

Chemico M1 mist eliminator

Spare parts for Chemico mist eliminators

Refurbish existing mist eliminators

Design:

The Chemico M1 mist eliminator design is a conventional 4pass blade design that is proven in operation for more than 40 years.

Function and characteristics:

The Chemico M1 mist eliminator is known for being quite resistant to plugging and scaling. The four passes are built from four separate blades. The gaps between the blades prevent the plugging of the mist eliminator.
